

Erik is an Assistant Professor in the Department of Elementary Education at Stephen F. Austin State University. Erik received his Ph.D. from Michigan State University's Curriculum, Teaching, and Educational Policy Program. His fields of specialization include educational technology, curriculum foundations, global education, and elementary social studies. Erik's primary research surrounds the meanings and uses of educational technology among elementary school teachers and students. The research is comparative and international in scope as Erik has conducted field studies in Cuba, England, India, South Korea, and throughout the United States. Over the 2010-2011 academic year, he lived in Bangalore, India, and collected dissertation data on how an economic cross-section of Bangalore's elementary schools were using computer technology in their schools. Erik is currently revising his dissertation into a book format, which will be published with SAGE Press in New Delhi, India.
